

Biostatistics Collaboration and Consulting Core (BCCC) Biostat Clinics

BEFORE CTSI:

2-10-2011 - Biostatistical Collaboration in Clinical and Translational Research, by Dr. Shari Messinger, Associate Professor and Director of the Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

3-10-2011 - Statistics 101, by Dr. Hua Li, Assistant Scientist and Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

4-14-2011 - Sample Size and Power Considerations in Clinical and Translational Research, by Kaming Lo, Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

5-11-2011 - Experimental Design, by Dr. Robert Duncan, Professor, Division of Biostatistics, Department of Epidemiology and Public Health.

9-13-2011 - Out of Sight, Not Out of Mind: Missing Data, by Dr. Tulay Koru-Sengul, Assistant Professor, Division of Biostatistics, Department of Epidemiology and Public Health.

10-18-2011 - Conducting Implementation Research with Rigorous Randomized Trials, by C. Hendricks Brown, Professor, Epidemiology and Public Health, Director, Center for Prevention Implementation Methodology for Drug Abuse and Sexual Risk Behavior, Director, Social Systems Informatics, Center for Computational Science.

11-14-2011 - Introduction to Structural Equation Modeling (SEM), by Dr. Maria Llabre, Professor, Department of Psychology.

1-19-2012 - Experimental Design, by Dr. Robert Duncan, Professor, Division of Biostatistics, Department of Epidemiology and Public Health.

2-9-2012 - Hypothesis Testing, by Fei Tang, Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

3-8-2012 - Why You Need to Understand Consort When Planning a Clinical Trial, by Dr. Daniel Feaster, Associate Professor, Division of Biostatistics, Department of Epidemiology and Public Health.

4-19-2012 - Sample Size and Power Considerations in Clinical and Translational Research, by Kaming Lo, Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

AFTER CTSI:

9-17-2012 - Data Visualization: Abstract, by Dr. Huiliang Xie, Assistant Professor, Division of Biostatistics, Department of Epidemiology and Public Health.

10-15-2012 - An Introduction to R, by Dr. Andrew J. Wawzyniak, Research Assistant Professor, School of Nursing and Health Studies

1-14-2013 - Statistics 101, by Dr. Hua Li, Assistant Scientist and Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

2-25-2013 - Sample Size and Power Considerations in Clinical and Translational Research, by Kaming Lo, Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

4-29-2013 – Hitchhiker's Guide to Conducting a Genome-Wide Association Study (GWAS), by Dr. Evadnie Rampersaud, Research assistant Professor, Director, PhD Graduate Program in Epidemiology, Head, Division of Genetic Epidemiology, John P. Hussman Institute for Human Genomics.

5-10-2013 - CTSA Tool Shop muStat (U-statistics for multivariate Data), by Dr. Evadnie Rampersaud, Research assistant Professor, Director, PhD Graduate Program in Epidemiology, Head, Division of Genetic Epidemiology, John P. Hussman Institute for Human Genomics; and Kaming Lo, Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

9-16-2013 – Seminar: Statistical Consideration in Clinical Research, by Dr. Shari Messinger, Associate Professor and Director of the Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

10-28-2013 – Data Considerations in Clinical and Translational Research, by Kaming Lo, Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

12-16-2013 – Microarray Gene Expression Analysis, by Dr. Evadnie Rampersaud, Research assistant Professor, Head, Division of Genetic Epidemiology, John P. Hussman Institute for Human Genomics.

1-21-2014 – Working with Research Data: An Introductory Workshop, by Dr. Don Parris, CCRC Director of Population Health and Outcomes Research at Baptist Health South Florida.

6-23-2014 – Random Forests: An Example From Cardiology, by Robert O'Brien, Biostatistician, Biostatistics Collaboration and Consulting Core, Division of Biostatistics, Department of Epidemiology and Public Health.

7-21-2014 – Power Calculations for Genomic Studies, by Dr. Evadnie Rampersaud, Research assistant Professor, Head, Division of Genetic Epidemiology, John P. Hussman Institute for Human Genomics.

8-18-2014 – Failure Time Analysis, by Carol Horvitz, PhD, Professor, Biology Department, University of Miami.

9-15-2014 – REDCap and Database Development, by Maurice Duque, M.S., M.S.Ed. Database Analyst, Information Technology, University of Miami.

10-20-2014 – Why You Need to Understand CONSORT When Planning A Clinical Trial, by Daniel Feaster, Ph.D., Associate Professor, Division of Biostatistics, Department of Public Health Sciences.

11-17-2014 – An Introduction to REDCap: Free, User-friendly, Secure, Web-based Software to Collect Research Data, by Raymond R. Balise, Ph.D., Assistant Professor, Division of Biostatistics, Department of Public Health Sciences, and Department of Urology.

12-15-2014 – Power Calculations for Genomic Studies, by Dr. Evadnie Rampersaud, Research assistant Professor, Head, Division of Genetic Epidemiology, John P. Hussman Institute for Human Genomics.

2-23-2015 – Causality, by Alejandro Mantero, Ph.D. Candidate, Department of Public Health, Division of Biostatistics, Biostatistics Collaboration and Consulting Core (BCCC).
